4 Serial Ports

Expansion Slots

512MB DDR

160 GB Hard Drives (15"/17")

5-wire Touchscreens

Fanless Models

Windows XP, XPE or Linux

Web Studio Starter Kit

Power Panel PCs  
including HMI/SCADA  
Software starter kit

Specifications, Price, Warranty and the included Web Studio Starter Kit are the four leading reasons our Orion A-Series is the bright new star in its class.

Where other brands offer one basic Ethernet port and a limited number of USB ports, the Orion A-series impresses with blistering fast dual Gigabit Ethernet ports and 6 USB 2.0 ports. Build to perform 160 GB of Hard Drive space and 512MB DDR memory come as a standard on the 15" and 17" models.

Windows XP Professional, Linux or Windows XP Embedded? We understand that different users have different needs and offer all three options. Discover the ease of usage and power features of the award-winning Web Studio HMI/SCADA package; a free starter kit is included with every first time purchase.

24 months of warranty, twice the market-average, is a clear statement of our confidence in the durability of every Orion A-Series model. Many additional memory, CPU and add-on options are available upon request.

Price! Good specifications, a solid warranty and additional software are all important aspects, but in today's economic climate price is also a major factor. The Orion A-series is "made-to-compete" on all points, including price!
