

Wide-Screen Platinum Series

Sometimes more is just what the project demands.

Our new Platinum Series demonstrates that more power, more memory and more flexibility does not need to go hand-in-hand with more cost!

Powered by the Intel 945GSE Chipset and Intel Atom N270 1.6GHz. CPU the Platinum Series combines power with energy saving technology. An optional Core 2 Duo is available for additional power if needed.

The 10.1" TFT Wide (16:9) Touchscreen supports 256,000 colors. Two Gigabit Ethernet ports, four USB ports and 2 serial ports are standard on this industrial grade PC.

1 GB DDR memory (upgradeable to 2 GB), 80 GB of hard disk space and a 44-pin IDE connection provide sufficient memory capability.

With a choice of three operating systems; Windows XP Professional, XP-Embedded or Linux (software sold separate, see pricelist for details) we are sure to offer a system meeting your needs.

The Platinum Series is available in two convenient enclosure models: Panel mount or Chassis.

10P-11HHC: Platinum Series 10.1" Chassis.

10P-11HMP: Platinum Series 10.1" Panel Mount.

10P-1HMP : Platinum Series 10.1" Panel Mount. (without front adjustable brightness option)
