Cash in with Banner by the End of the Month and Save

**Stock Up on Banner Sensors, Safety
and Lighting Products Before 2017 Price Increases**

Good News! The stock market is back on its feet and companies are growing. Now is your chance to cash in on lower prices before 2017's upcoming inflation.   Every day, Banner Engineering helps companies all around the world implement automation technologies, improve processes and gain a competitive edge.   Our industry-dedicated specialists work in close collaboration with our customers and partners to provide insights, identify problems and overcome challenges.   We offer one of the most comprehensive and technologically advanced collections of automation products on the planet and are able to provide custom solutions quickly and cost-effectively.

EZ-SCREEN LS Rugged Safety Light Screen

The Lean & Simple design of the EZ-SCREEN LS combines Machine Safety and the notion of Lean Manufacturing by focusing on features that provide high-value for most applications while eliminating those that unnecessarily add cost and complicate the installation, use, and maintenance of the device. Enhanced features that include intuitive bi-color alignment indicators, automatic cascade configuration, end-to-end sensing design for "no blind zone" installations, robust IP65/IP67 housing with metal end caps, and more.

XS26 Expandable Safety Controller

The XS26-2 and associated expansion modules continue the development of a new safety controller platform that began with the SC26-2. With up to eight I/O expansion modules, the XS26-2 platform allows Banner to address larger scale machines that were previously out of reach. The XS26-2 was designed to be easy to use, flexible and efficient.

The QS18 High-Performance Clear Object Detection Sensor

Banner's latest addition to the QS18 Series is a high-performance clear object detection

sensor. It has a polarized coaxial optical design that ensures reliable detection of transparent, translucent, and opaque targets at any distance between the sensor and the reflector.

It utilizes the universal QS18 housing with side or barrel mounting options and offers the same ease-of-use advantages offered by other sensors in the QS18 Series, including single push teach or remote teach setup. This cost-effective clear object sensor has a fast 400 microsecond response time, ideal for bottling or packaging applications.
