CONTROL & AUTOMATION

Call Us Today with Your Next Project 1-800-237-8274

Get Sysmac Studio Lite Edition FREE for a Limited Time*

Leverage the power of the Sysmac platform using the recently launched NX1P CPU series machine automation controllers with our HMIs. The Omron HMI enables faster, more efficient control and monitoring - and a more natural, proactive relationship between operator and machine. The design has been based on real applications and customer requirements, a future-proofed, scalable platform that will evolve with their ever-changing needs, allowing real time reaction to events. As part of the system family, the NA Series is fully aware of the total machine.

We are rolling out 2 different software offers to meet your automation needs. *For a limited time, get Sysmac Studio Lite Edition FREE, a \$995 value, when you choose one NX1P series CPU and one NA series HMI or 50% off when you choose one NX1P series CPU and one NB series HMI. Offer valid February 1, 2017 to April 30, 2017.

Domo Arigato Mr. Roboto! LD Autonomous Intelligent Vehicle

These Mobile Robots are transport vehicles equipped with proprietary artificial intelligence (AI) technology, that allows it to transport materials to a target location while calculating the optimal route and avoiding humans and obstacles. The robots are ideally suited for a wide range of indoor environments, including manufacturing and logistics facilities for automotive, electronics, foods and pharmaceuticals industries. The Mobile Robots contribute towards the resolution of social issues by liberating human workers from the simple, monotonous and exhausting labor of carrying items, giving them the freedom to engage in more creative work. In addition, the AIVs work together with fixed-material-handling equipment and for the first time offer users true flexibility in factory design.

Team Up with a Company that Has Global Stock and Support

Our sales network of approximately 150 offices in 40 countries / territories around the world gives powerful support for our customers' globalization activities. We not only offer a selection of control equipment, but also a comprehensive support network for every phase of the process of making things, from development and production to maintenance support. Contact information for each country is listed under Global Network.

We specialize in:

■ Sensors ■ Switches ■ Safety Components ■ Relays ■ Control Components ■ Automation Systems ■ Motion / Drives ■ Robotics ■ Energy Conservation Support / Environment Measure Equipment ■ and Power Supplies
